

BIO-SIZE®

Product Information

GENERAL INFORMATION

BIO-SIZE is a natural fermentation by-product of selected beneficial microbes. **BIO-SIZE** is neither a plant food nor live microorganisms but it is designed to stimulate many of those essential microbial functions. **BIO-SIZE** is designed to stimulate many of those essential plant functions. **BIO-SIZE** stimulates the plants to better utilise their natural reserves and to grow at their full strength. It enhances the ability of plants to utilise nutrients more effectively. The result of the application of **BIO-SIZE** is healthier plants which in turn improves fruit uniformity and therefore can increase yields.

BIO-SIZE can be applied to ALL crops including all vegetables, Potatoes, Carrots, Onions, all berries and strawberries, all Brassicas, all fruit trees, Avocados, Persimmons, Citrus, all Nut trees, Vineyards, Kiwifruit, Tropical fruit, Lettuce, Asparagus, all Melons, Beans, Ginger, Ornamentals, Cut flowers and Pastures.

GUARANTEED ANALYSIS

Extract of microbial culture: 1.1%.

Total Water Contents: 98.9% (w/v)

KEEP OUT OF REACH OF CHILDREN

COMPATIBILITY: **BIO-SIZE** is compatible with almost all fungicides, fertilisers and insecticides.

BIO-SIZE is **COMPATIBLE** with trace elements, Magnesium, Potassium, Phosphorous and Calcium foliar nutrients.

Directions and General Recommendations

SOIL APPLICATION

Apply **BIO-SIZE** at 2.5 - 3 Litres per hectare through drip irrigation before flowering. Repeat as needed after flowering.

FOLIAR APPLICATION

Apply **BIO-SIZE** at 2.5 - 3.0 ml¹ of water and spray on to the foliage of the plants. Repeat as needed.

ALL FIELD CROPS (grain crops, flowers, etc.): Apply 2.0 - 3.0 Litres per hectare of **BIO-SIZE** once the crop is 15 - 20cm in height. Repeat the application 4 - 6 weeks later.

ALL VEGETABLE CROPS: Apply 2.5 - 3.0 Litres per hectare of **BIO-SIZE** 3 - 4 weeks after planting / transplanting and then once every month throughout the growing season.

POTATOES & CARROTS: Apply 2.5 - 3.0 Litres per hectare of **BIO-SIZE** six weeks after planting once potatoes are at 3-5 cm in diameter and carrots are at 10-15 cm in height after emergence. Repeat at bulking stage.

GREENHOUSE CROPS: Apply **BIO-SIZE** at 2.5 - 3.0 ml¹ 1L of water and spray on to the foliage of the plants. Repeat every month. Alternatively, inject through irrigation water at 200mL / 1gloo (400sqm) once every month.

APPLES, POME & STONE FRUIT: Apply 2.5 - 3.0 Litres per hectare of **BIO-SIZE** at fruit set. Repeat the application 7-10 days later, and

another repeat application is required 7-10 days after the 2nd application. Ensure all applications are made within 21 days after fruit set.

FRUIT TREES & AVOCADOS: Apply 2.5 - 3.0 Litres per hectare of **BIO-SIZE** at fruit set. Repeat the application 7-10 days later, and another repeat application is required 7-10 days after the 2nd application. Ensure all applications are made within 21 days after fruit set.

KIWIFRUIT: Apply 2.5 - 3.0 Litres per hectare of **BIO-SIZE** at fruit set. Repeat the application 7-10 days later, and another repeat application is required 7-10 days after the 2nd application. Ensure all applications are made within 21 days after fruit set.

TABLEGRAPES: Apply 2.5 - 3.0 Litres per hectare of **BIO-SIZE** at fruit set. Repeat the application 7-10 days later, and another repeat application is required 7-10 days after the 2nd application. Ensure all applications are made within 21 days after fruit set.

WINEGRAPES: Apply 2.5 - 3.0 Litres per hectare of **BIO-SIZE** at fruit set. Repeat the application at veraison in the event of berry shrivel.

BIO-SIZE PLUS is best applied when plants are in an active growing stage. **BIO-SIZE** may be used at any time throughout the season. For best results and more specific recommendations, contact your nearest distributor.
