

# FERTILE

# Vine

10-13-15 (2% Mg + TE)

## Product Information

### GENERAL INFORMATION

Vine nutrition is an important aspect of wine and table grape production. Nutrition needs to be allocated the same level of importance as any other aspect of vine production for profitability and viability in such a competitive, quality driven industry.

**FERTILE VINE** was especially formulated for a dual purpose. The high quality products used in the manufacture of **FERTILE VINE** deem it pure and suitable for fertigation as well as foliar application.

**FERTILE VINE** is ideal for all crops. It is especially of benefit early in the season due to its high Phosphorous content, helping crops make it through a cool early spring period.

**FERTILE VINE** is 100 percent pure and soluble. It dissolves instantly in water and it adapts to your established spray program and can be applied at the same time as other chemicals.

### GUARANTEED ANALYSIS

|             |     |
|-------------|-----|
| Nitrogen    | 10% |
| Phosphorous | 13% |
| Potassium   | 15% |
| Magnesium   | 2%  |
| Sulphur     | 4%  |

+ all Trace elements in Biomin form including Molybdenum

### KEEP OUT OF REACH OF CHILDREN

**COMPATIBILITY:** **FERTILE VINE** is compatible with almost all fungicides, fertilisers and insecticides. It is NOT compatible with Calcium based products nor Copper based products. Always run a jar test prior to application to verify compatibility.

### NET CONTENTS

[ ] 20 kilograms

## Directions and General Recommendations

### SOIL APPLICATION

Apply **FERTILE VINE** at 15 - 20 Kilograms per hectare per application. Repeat as needed.

### FOLIAR APPLICATION

Apply **FERTILE VINE** at 1 - 3 grams / 1L of water and spray on to the foliage of the plants. Repeat as needed.

**FERTILE VINE** is best applied when plants are in an active growing stage. **FERTILE VINE** may be used at any time throughout the season. For best results and more specific recommendations, contact your nearest distributor.

### ADVANTAGES & BENEFITS

**FERTILE VINE** is specially formulated to give young and established crops a strong headstart. It is ideal for use in all fertigation systems.

**FERTILE VINE** is ideal for use on older crops if they lack vigor, flowering, and fruit set.

**FERTILE VINE** is ideal for post harvest applications to build enough nutrient reserves for next years crop.

**FERTILE VINE** has high amounts of soluble P and K which makes it ideal if used in periods of stress (cold and hot weather).

### LIMITED WARRANTY

Manufacturer or reseller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor reseller shall be liable for any injury or damage caused by this product due to misuse, mishandling or any application not specifically described on the label.

### EASE OF APPLICATION

**FERTILE VINE** is ideal for application by underground sprinkler systems, injectors, pumps, power sprayers, proportioners, irrigation systems and most other application equipment. It adapts to any established program.

### ADAPTABLE TO FOLIAR FEEDING

All **FERTILE** formulations can be base-fed or foliar-fed to your crop, with maximum effectiveness. Our specially chelated micronutrients are quickly, and safely absorbed through both the roots and the foliage.

### LOW SALT INDEX

All formulations of **FERTILE** are made without the use of chlorides nor products high in sodium, therefore they are made from high quality ingredients.

### COST EFFECTIVE AND VERSATILE

**FERTILE VINE** can also be used as a foliar application supplying the crops with all macro and micro nutrients with every application, promoting balanced nutrition making the product extremely cost effective.

**FERTILE VINE** aids in preventing plant and fruit susceptibility to disease by increasing the overall health and mineral balance of the crop.
